Artificial Intelligence (AI)

KIRO IDE

Agile Project Management

Ella Chulpaev

System Analyst | Technical Product & Project Manager | Senior
Software Engineer

Israel

Summary

With over 10 years of experience designing and delivering high performance software solutions, I moved from writing code myself to planning how the entire system should work. My journey from Senior Software Engineer to Systems Analyst allows me to bring a unique perspective to every project, ensuring that business requirements are technically scalable and robust. I bring a deep, hands-on understanding of the entire development process within Agile teams. Using Kiro IDE and AI-powered tools, I design Microservices, optimize complex SQL, and deliver scalable Big Data solutions more efficiently. This background gives me a distinct advantage in troubleshooting and identifying system constraints that others might miss.

Experience

Bank Hapoalim בנק הפועלים

System Analyst

September 2025 - Present (8 months)

Tel Aviv District, Israel

Maccabi Health care Services

System Analyst and Project Manager

July 2024 - August 2025 (1 year 2 months)

Tel Aviv District, Israel

ACUM

Senior Full Stack Engineer and Systems Analyst

December 2008 - November 2023 (15 years)

Ramat Gan, Isarel

- Designed and developed applications using JAVA, SPRING, Hibernate, JPA, Maven, Jenkins (CI/CD), Git and DB2 to enable users to interact with dynamic content management systems.

- Implemented a user-friendly front-end design with JavaScript, HTML, CSS, AJAX, JSON and jQuery to ensure an excellent user experience.
- Led the development of new software products and enhancements to existing products, ensuring the delivery of clean, high-quality, high-performance, and maintainable code.
- Managed product lifecycle, analyzed customers challenges and requirements, provided production support.

Amdocs

Java Backend Engineer

June 2005 - November 2008 (3 years 6 months)

Raanana, Israel

- Developed applications using JAVA, Spring, Hibernate, Oracle-DB, ANT, XML, Unix/Linux.
- Developed features and optimized existing code to improve application scalability and performance.
- Maintained and updated existing applications, resolving bugs and improved user experience.

Education

Ariel University

PhD student, Industrial Engineering and Management · (December 2023 - September 2025)

Holon Institute of Technology

Master of Science - MS, Industrial engineering and management · (October 2018 - March 2022)

Tel Aviv University

Bachelor of Science - BS, Mathematics and Computer Science · (2000 - 2004)
